AN OVERVIEW TO EVO BEARINGS AND MACHINERIES PVT . LTD

EVO Bearings and Machineries Pvt. Ltd., invented in the year 2015, is an ISO 9001: 2008 Certified Company.

Serving across globe, main focus in PAN ASIA

EVO Bearings and Machineries Pvt. Ltd. is a technology adapted by German. It matches and qualifies with all the factors of specification that soothe the life of the machine. Quality of EVO is the first priority. We believe in quality and services.

We are in Hyderabad, is one of the leading ball bearing manufacturers specialised in research and development for various kinds of high precision, non-noise making, long-life bearings. We specialize in the production of high quality, precision ball bearings and roller bearings. We are a strong enterprise, innovating with various groups of professional engineers and salesmen.

We have fulfilled certain non standard ranges of our bearing for forgings, cement, crusher based industry customers.

We have served wide in *Cement Industry, Automotive Industry, Steel Industry, Wind Mill Energy, Oil and Gas Industry, Refineries, Agronomic Industry, all Crusher Based Industry, FMCG Industries, Food Industries, Pharmaceuticals, Sugar Industry, OEM 's.*

Apart from bearings we are also into V Belts, Transmission Chain, Conveyor Belts and Crusher Spares.

Our technology and innovations in increasing day by day and will get more roots through generations.

Our major assembling is done in India with imports of all the parts.

Our bearing is made up of 52100 grade steel . And even we develop stainless steel bearings with SS304 and SS302 grade.

We also develop heavy duty and Kevlar cords V Belts for more durability and life of the belts associated with Japanese and Singapore company for belts.

We have managed to add several success stories to our list. His understanding of the domain and the ability to make quick decisions have been our assets. Further, his will to develop the firm has given its employees a huge learning platform. We export our product All Over The World.
